

Aptitude Software leading the bold; product and solution launches are a focus of today's AptConnect 2020 event

From a new services offering to a SaaS version of a flagship product

NEWS | For Immediate Release – 15 OCTOBER 2020

Aptitude Software, a leading provider of financial management software, will virtually host their second annual community event, AptConnect 2020, today.

The conference theme this year is 'Evolving finance for an unremitting world' and will focus on providing practical advice and guidance on thriving in turbulent times while preparing for the future of finance. Over 300 finance professionals from around the world are participating.

The agenda includes speakers from several global organizations including Red Hat, T-Mobile, ING, and Transamerica who will share insights and perspectives on the future of the finance department as well as learnings from finance transformation and compliance initiatives. Aptitude Senior Leaders and Product Owners will also announce several innovative new offerings and new product features and capabilities. A core theme of the event is the need to act boldly in order to set your organization apart in these times. In this light, a number of exciting new products and offerings will be launched at this year's event, each one supporting the digital transformation happening within the finance department. This includes:

Aptitude Accounting Hub (AAH) SaaS: Aptitude's flagship accounting hub and subledger solution is now available in a SaaS model to support organizations looking for cloud hosted options. All existing AAH features and capabilities will be available in the SaaS offering.

Aptitude Calculate: Previously sold under the name, Aptitude Allocation Engine, Aptitude has renamed the product to reflect the breath of cross industry use cases beyond just allocations. Aptitude Calculate can be applied to any use case that requires a cost, expense, or investment allocation or any supplementary calculation needed to support the finance function and its data preparation and reporting requirements.

Aptitude IFRS 17 Comply: Comply is a simplified, pre-configured version of the existing Aptitude IFRS 17 Solution. It is designed for insurers that are looking for a faster, more standardized path to IFRS 17 compliance, while laying the foundation for future transformation projects. IFRS 17 Comply will be available as a SaaS or on-premises version.

Solution Management Services (SMS): SMS is a flexible, packaged, post go-live support framework that goes beyond product support to include services to optimize and extend client's specifically configured solution, providing full end-to-end management.

To learn more about the products and offerings launched at today's AptConnect 2020 conference, please [register](#) for the event to gain access to the content on-demand or reach out to info@aptitudesoftware.com for more information.
