Aptitude RevStream

Aptitude RevStream delivers ASC 606 and IFRS 15 compliance features and automated revenue recognition in a dynamic interface to simplify revenue lifecycle management.

Transaction Hub

Allows management of complex multi-element arrangements without relying on complicated spreadsheets and manual processes. It centralizes bookings, arrangements, and performance information, with automation for analysis, identification, and updating of linked arrangements.

Revenue Arrangement Manager

Most advanced arrangement grouping logic available. New arrangement summary page that combines arrangement, performance obligations, deferred and revenue balances, and accounting in a single view by reporting method. Also offering the highest level of flexibility in establishing performance obligations for customers.

Powerful Configuration Engine · Intuitive New User Interface · 360 Degree View of Revenue Contracts · Beautiful Dashboards and Reporting Capabilities · Comprehensive Data Management

Revenue Recognition Manager

Systematic approach to revenue recognition to expedite period closes, increase process efficiency, and reduce risk of noncompliance. It automates complex accounting calculations, such as allocations, carve-outs, recognition triggers, revenue schedules, and more.
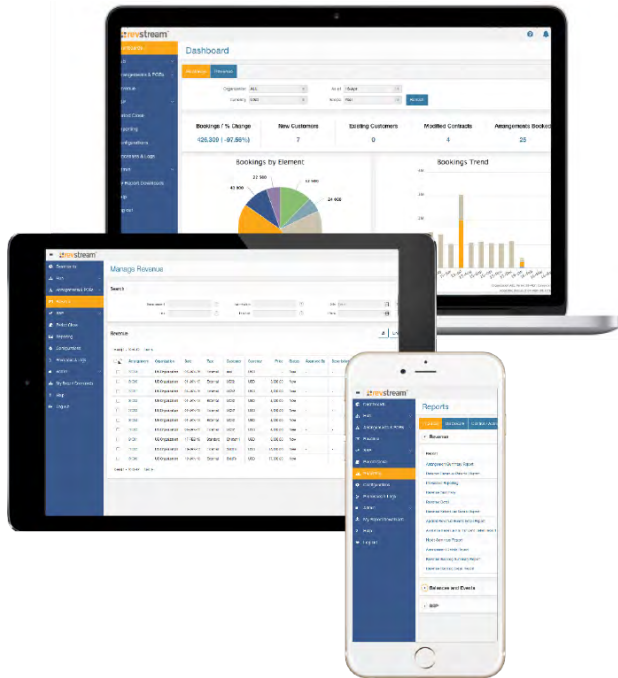

SSP Engine

Automates BESP/VSOE analysis to determine fair value pricing. Used as a standalone application or complementary with Aptitude RevStream Revenue Manager, it enables intuitive fair value capturing, analysis, and testing based on historical sales transactions.

Reporting

A rich, interactive platform that leverages robust operational and revenue data contained within Aptitude RevStream, to provide businesses with extensive reporting capabilities. Out-of-the-box capabilities include financial performance data and operational metrics through disclosure, financial, and ad-hoc reports, rich charting, and customer specific KPIs.

Integration

Provides fast and secure Aptitude RevStream REST APIs and pre-built connectors to integrate data to and from Aptitude RevStream. Additionally integrates flat files, CSV files, and upload utilities, connecting automatically with cloud, on-premise ERP, or billing applications. It can be managed as a scheduled process or on-demand.

Automating and Managing the Complete Revenue Lifecycle

Aptitude RevStream provides companies across a wide range of industries with a powerful cloud-based platform for automating and managing revenue recognition processes. The solution dramatically improves revenue recognition business intelligence and analytics by centralizing all sales and revenue data in a single system to enable an enterprise view. This approach allows customers to improve accuracy and reduce compliance risks, while delivering the revenue intelligence and visibility needed to make smarter decisions about customer contracts, product pricing, and revenue deferrals.

Aptitude RevStream has changed and improved revenue management at Intuit. The tool has effectively sped up our ability to manage revenue, account for revenue appropriately, reducing the financial risk associated with doing manual accounting and automating revenue recognition process at its fullest.

-Mark Flournoy, VP and Chief Accounting Officer, Intuit
